WHITTIER INCIDENT SAFETY MESSAGE

INCIDENT WHITTIER INCIDENT

DATE: 7/9/17 Day Shift 0700 - 1900

Situational Awareness at All Times!

Fire behavior: Maintain LCES and situational awareness. Monitor weather observations. Have a contingency plan with established decision points and safety zones.

Complacency: ALL PPE must be worn when working on the fire line. Wear appropriate PPE for the task being performed. Mop up requires your situational awareness even without active fire. Unburned fuels can reignite suddenly and turn against you.

Fatigue: Manage yourself and those around you for excessive fatigue; many have driven long distances or been redeployed from other incidents. Use the buddy system and take breaks as needed. As fatigue increase, injuries tend to increase also.

Eat and drink fluids on a regular basis to maintain an appropriate energy level for any expected work assignment. Remember, you are the only one that knows your limitations.

Driving: Slow Down, Wear your Seatbelt at all times and Increase your Following Distance. Evacuations may cause congestion to the roads.

Environmental hazards: Rattle snakes, tics and poison oak is in the area. Check for tics after working on the line. Clean after poison oak exposure. Keep a look out for rattle snakes.

Incident Safety Officer: Fred Tan

Incident Commander: _____
